

AJ Futo

hello@ajfuto.com | ajfuto.com | linkedin.com/in/ajfuto | Bay Area, CA

WORK EXPERIENCE

- | | |
|---|---------------------------------------|
| R&D S&E, Cybersecurity
Sandia National Laboratories | June 2023 – Present
Livermore, CA |
| Cybersecurity R&D Intern
Sandia National Laboratories | May 2022 – June 2023
Livermore, CA |
| Computer Science Course Staff
University of Central Florida | Aug. 2022 – May 2023
Orlando, FL |
- Reinforcing concepts including algorithm design and analysis, graph theory, etc.
 - Intro to Programming in C, Object Oriented Programming, Data Structures and Algorithms.

EDUCATION

- | | |
|---|----------------------|
| Bachelor of Science in Computer Science
University of Central Florida
Minor in Secure Computing & Networks | May 2023
3.96 GPA |
|---|----------------------|
- **Honors:** Summa Cum Laude, NSF CyberCorps Scholarship for Service (SFS), Provost Scholarship
 - **Coursework:** Cryptography, Network Security & Privacy, Linear Algebra, Adv. Data Structures & Algorithms

PROJECTS

- | | |
|---|---------------------|
| Homelab: Hosting local and public-facing services
Administrator & Developer | Jan. 2022 – Present |
|---|---------------------|
- Deploy critical services including DNS, authentication (SSO), private cloud storage, and media backup.
 - Develop custom Docker images alongside deploying curated open-source containers to meet custom needs.
 - Architect and manage an environment of 75+ Docker containers across three discrete physical nodes.
 - Securely expose select services via reverse proxies, VPN, Cloudflare WAF/Tunnels, and single sign-on.
 - Implement a robust backup strategy with local, offsite, and cloud redundancy to ensure data resilience.
 - Integrate centralized monitoring and alerting for service health, host performance, and container metrics.
- | | |
|---|----------------------|
| Cloak: Man-in-the-middle packet capture and analysis system
Project Manager & Networking Lead | Sep. 2022 – May 2023 |
|---|----------------------|
- Directing frontend, backend, and device development teams using Agile-style methodologies.
 - Creating a lightweight device to capture packets from a host using Python, TShark, C, and Bash.
 - Designing algorithms to examine raw packet data and provide modular data analytics.
 - Developing a performant and parameterized RESTful Node.js API to access refined packet data.

SKILLS

- | | |
|----------------------|--|
| Technologies: | Networking, virtualization, zero trust, cloud security, multi-cloud infrastructure |
| Languages: | Python, Java, C/C++, JavaScript, TypeScript, Bash, Terraform, Express.js, Node.js |
| Platforms: | AWS, GCP, Azure, OCI, Docker, GitHub & GitLab CI/CD, Proxmox |
| Professional: | Leadership, team management, technical presentations, mentoring, recruiting |
